Call for Website Contributions

betterhealthcaretechnology.org wants your contributions!

If you have a special long or short article, a blog, a story, an idea or a feature to contribute, please feel free to send your proposal to the not-for-profit betterhealthcaretechnology.org Foundation.

Who is betterhealthcaretechnology.org?

betterhealthcaretechnology.org supports initiatives involving physics, engineering and associated sciences for patient care in Australian and New Zealand hospitals. It also funds voluntary projects in Asia-Pacific hospitals where expert assistance is required.

The Foundation encourages leading, innovative activities applied to diagnostic and therapeutic techniques or technology that directly benefit patients. A particular focus is on work in the physical sciences for cancer care, medical imaging and biomedical engineering for surgery and clinical instrumentation.

betterhealthcaretechnology.org offers an open forum to gather information, educate and collaborate with the public, industry and medical professionals.

Who can contribute?

betterhealthcaretechnology.org is a public website open for everyone to use.

Beyond initially registering, there are no barriers to become a member of *betterhealthcaretechnology.org*. Members may contribute articles, make comments or participate in discussions posted on the website.

In addition to those applying *betterhealthcaretechnology.org*, the Foundation seeks to register the broadest spectrum of other interested followers who may be:

- the public, a patient or a concerned relative;
- a medical practitioner;
- an allied health worker;
- a health administrator;

- medical technical support;
- an industry representative; or
- an academic

Publishing blogs or articles on *betterhealthcaretechnology.org* is an ideal venue to make your message be seen.

Patients and Public

If you're a patient or concerned relative, then *betterhealthcaretechnology.org* provides valuable information in the blogs and articles.

The website does not provide medical advice. That should only be obtained through your personal medical practitioner.

But *betterhealthcaretechnology.org* provides an easy method for making technical inquiries concerning a treatment technology or technique used in medicine.

Medical Professionals

Whether you're an early-career, mid-career or a leader working or associated with the field of physics, science or engineering in medicine, *betterhealthcaretechnology.org* offers you an opportunity to build your professional and communication skills by:

- Gaining a raised profile in the medical fraternity and the public community;
- Having an avenue to report your innovative work in progress;
- Utilising the non-peer reviewed website process for rapid publishing of work, news or ideas;
- Receiving feedback opportunities from your peers and learning in the process; and
- Developing a global contact network for your professional initiatives;

Activities to this level are worthy credits for your on-going professional development.

What do betterhealthcaretechnology.org funds support?

Funds raised by the Foundation will primarily be used to:

- support emerging specialists in Australia, New Zealand and the Asia-Pacific region; and
- foster the next generation of leaders in this field who will work on innovative projects for the benefit of patients treated with better-healthcare-technology
